Inputs

```
base_train <- read.csv(here("data", "base_train.csv"))
base_validation <- read.csv(here("data", "base_validation.csv"))
```

```
# Combining train and validation datasets to one
# Because we are going to use CV to train the models later
# naming it df_base_train2 to remain consistent with df naming
df_base_train2  <- rbind(base_train, base_validation)

cat("number of rows in combined train data:", nrow(df_base_train2), sep = " ")
```

```
## number of rows in combined train data: 7184
```

```
# Training structural equation for wind speed
# wind_speed = f(track_min_dist, eps)

base_wind_model <- readRDS(here("unadjusted SCM/new base models",
                                "dec_base_wind_model_tuned.rds"))

base_rain_model <- readRDS(here("unadjusted SCM/new base models",
                                "dec_base_rain_model_tuned.rds"))
```

```r
# Predict using model "base_wind_model"
# To get variable: wind_max_pred
df_base_train2[["wind_max_pred"]] <- predict(base_wind_model, newdata = df_base_train2)

# Predict using model "base_wind_model"
# To get variable: wind_max_pred
df_base_train2[["rain_total_pred"]] <- predict(base_rain_model, newdata = df_base_train2)
```

Interaction terms (moderators)

```r
# Define wind and rain interaction variables
wind_fractions <- c("blue_ss_frac", "yellow_ss_frac", "orange_ss_frac", "red_ss_frac")
rain_fractions <- c("blue_ls_frac", "yellow_ls_frac", "orange_ls_frac", "red_ls_frac")

# Compute wind interaction terms dynamically
# Compute wind interaction terms dynamically
for (col in wind_fractions) {
  print(col)
  new_col_name <- paste0("wind_", col)
  df_base_train2 [[new_col_name]] <- df_base_train2 [[col]] * df_base_train2 [["wind_max_pred"]]
}
```

```
## [1] "blue_ss_frac"
## [1] "yellow_ss_frac"
## [1] "orange_ss_frac"
## [1] "red_ss_frac"
```

```r
# Multiply rain fractions by rain_total_pred
for (col in rain_fractions) {
  new_col_name <- paste0("rain_", col)
  df_base_train2 [[new_col_name]] <- df_base_train2 [[col]] * df_base_train2 [["rain_total_pred"]]
}
```

```r
# Set up train control with custom seeds
